Amendments to the Claims

Claim 1(original): A method for providing enhanced content for play across multiple play platforms, comprising the steps of:

delivering media content to a client device;

delivering HTML content to a client device, the HTML content being accessible and usable by a plurality of client device platforms;

activating a browser to access the HTML content, the browser being located on and compatible for use with the client device;

activating firmware on the client device to access the media content; and

incorporating the accessed HTML content with the accessed media content.

Claim 2(original): A computer program for developing media content as recited in claim 1 further comprising a code segment that access the content recorded onto the recording medium by calling one of the plurality of directories, the directory being suitable for use with the platform of the client device.

Claim 3(original): A method for providing a common, cross platform framework for development of DVD-video content with DVD-ROM content as recited in claim 2 wherein the directories include HTML content.

Claim 4(original): A method for providing a common, cross platform framework for development of DVD-video content

with DVD-ROM content as recited in claim 2 wherein the directories contain JavaScript files.

Claim 5(original): A method for providing a common, cross platform framework for development of DVD-video content with DVD-ROM content as recited in claim 2 wherein the directories comply with ISO-9660 standards.

Claim 6(original): A method for providing a common, cross platform framework for development of DVD-video content with DVD-ROM content as recited in claim 2 wherein the directories contain platform specific code segments.

Claim 7(original): A method for providing a common, cross platform framework for development of DVD-video content with DVD-ROM content as recited in claim 2 wherein the directories support hybrid Windows/Macintosh discs, preserving resource forks for Macintosh operating systems.

Claim 8(original): A method for providing enhanced media content as recited in claim 2 wherein the HTML content is provided via a portable storage medium.

Claim 9(original): A method for providing enhanced media content as recited in claim 2 wherein the HTML content is provided via a network.

Claim 10(original): A method for providing enhanced media content as recited in claim 9 wherein the network is the Internet.

Claim 11(original): A method for providing enhanced

media content as recited in claim 1 wherein the HTML content is overlaid onto the media content.

Claim 12(original): A method for providing enhanced media content as recited in claim 1 wherein the HTML content is in the form of textual script, which scrolls with the media content.

Claim 13(original): A method for providing enhanced media content as recited in claim 1 wherein the HTML scrolls synchronously with the media content and wherein selecting a portion of the script navigates the user to a corresponding location in the media content.

Claim 14(original): A method for providing enhanced media content as recited in claim 1 wherein the HTML content is in the form of an HTML page that starts a movie and checks for related Internet sites.

Claim 15(original): A method for providing enhanced media content as recited in claim 1 wherein the HTML content includes a page that links to a website.

Claim 16(original): A method for providing enhanced media content as recited in claim 1 wherein the HTML content includes a plurality of HTML files for accommodating a plurality of platforms of client devices.

Claim 17(original): A method for enhancing multimedia content, comprising the steps of:  
providing a recording medium;  
recording multimedia content onto the recording medium;

integrating HTML content with the multimedia content;  
accessing the multimedia content and the HTML content,  
and  
playing multimedia content and the HTML content having  
been accessed.

Claim 18(original): A method for enhancing multimedia  
content as recited in claim 17 further including the step of  
recording the HTML content onto the recording medium.

Claim 19(original): A method for enhancing multimedia  
content as recited in claim 17 wherein the multimedia content is  
DVD content accessed by DVD firmware on a client device, and  
where the HTML content is stored locally on the client device.

Claim 20(original): A method for enhancing multimedia  
content as recited in claim 17 wherein the multimedia content is  
DVD content accessed by DVD firmware on a client device and  
wherein the HTML content is provided from a remote server via a  
network.

Claim 21(original): A method for enhancing multimedia  
content as recited in claim 17, wherein:

the multimedia content is DVD content;

the HTML content is a textual script of the DVD  
content; and

selection of a portion of the textual script navigates  
the multimedia content to a corresponding location in the  
multimedia content.

Claim 22(original): A method for enhancing multimedia  
content as recited in claim 17 wherein the multimedia content is
